Meridian Global Technologies Pvt. Ltd.

Document classification: Internal — IT Access Only **Applies to:** IT Support Team, Procurement **Last reviewed:** January 2026 | **Owner:** IT Infrastructure Team **Reference:** KB-IT-0045

---

1. Purpose

This catalog lists all software approved for installation on Company devices, standard hardware configurations by role, and asset lifecycle rules. It is referenced by the Laptop Provisioning and Software Installation runbooks.

2. Approved Software by Category

Category	Approved Tools	Approval Needed
Productivity Suite	Company Workspace (email, docs, sheets, slides)	None — pre-installed
Communication	Slack, Zoom	None — pre-installed
Development (Engineering)	VS Code, JetBrains suite, Git, Docker Desktop	Team Lead
Design	Figma, Adobe Creative Cloud	Manager
Project Management	Jira, Linear, Asana	Manager
Data & Analytics	Tableau, dbt, Snowflake	Department Head

	client	
Security	Endpoint agent (mandatory, pre-installed), 1Password	None — mandatory

Any tool not listed above must go through the Software Installation Rules process described in the IT Acceptable Use & Security Rules document before installation.

3. Standard Hardware Configuration by Role

Role Category	Laptop Spec	Additional Equipment
Engineering	16-core CPU, 32GB RAM, 1TB SSD	External monitor, docking station
Design	Apple Silicon, 32GB RAM, 1TB SSD	Color-calibrated external monitor
Sales & Customer-facing	Standard 16GB RAM, 512GB SSD	Noise-cancelling headset
General/Admin	Standard 16GB RAM, 256GB SSD	None
Executive	Premium ultraportable, 32GB RAM	Mobile hotspot device

Requests for configuration above the standard for a role require Department Head approval, logged against the asset request in the IT portal.

4. Asset Lifecycle

Stage	Policy
	New asset issued within 3 working days of

Provisioning	confirmed start date
Refresh cycle	Laptops refreshed every 3 years; phones every 2 years
Repair	Hardware faults logged as SEV-3, loaner issued within 1 business day if repair exceeds 2 days
Return	All assets returned within 5 working days of last working day per offboarding runbook
Disposal	Decommissioned assets wiped per NIST data sanitization standard and recycled via approved e-waste vendor

5. License Management

Software licenses are tracked centrally in the Asset Management system, linked to individual employee IDs. Named-user licenses are reassigned within 48 hours of an employee’s exit, following the offboarding runbook. Floating/concurrent licenses (e.g. design tools shared across a team) are managed by the relevant Department Head in coordination with IT.

Any department wishing to add a new named-user license for an existing approved tool should raise a request via the IT portal rather than purchasing directly, to ensure central visibility of license counts for renewal negotiations.

6. Ticket Categories

Category	Examples	Default Severity
Access Request	New account, permission change	SEV-4

Hardware Issue	Laptop fault, peripheral not working	SEV-3
Software Issue	Application crash, install failure	SEV-3
Network/Connectivity	VPN failure, Wi-Fi issue	SEV-2 to SEV-3
Security Incident	Phishing, suspected malware	SEV-1 to SEV-2
New Asset Request	Laptop, monitor, peripherals	SEV-4

7. Vendor-Managed Tools

Certain tools are managed directly by their business-owning department rather than central IT, though IT retains security oversight:

- CRM platform — owned by Sales Operations
- Marketing automation platform — owned by Marketing
- HRIS (HR portal) — owned by HR, IT provides infrastructure support only
- Finance ERP — owned by Finance, IT provides infrastructure support only

Access provisioning for these tools follows the owning department’s approval process, with IT executing the technical account creation upon confirmed approval.

8. Requesting a New Tool

Employees seeking to request a tool not on this catalog should submit a request via the IT portal, including business justification and expected number of users. Requests are reviewed on a rolling basis, typically within 5 business days, following the review process outlined in the IT Acceptable Use & Security Rules document (Section 5).

9. Contact

For catalog updates or license availability questions, contact it-assets@meridianglobal.example.
